HONEYWELL'S UOP REFINING TECHNOLOGY RECOGNIZED BY HART ENERGY FOR ENERGY AND ENVIRONMENTAL EXCELLENCE

UOP refining technology earns industry recognition for innovation and ability to address global energy challenges

DES PLAINES, Ill., Dec. 9, 2008 – UOP LLC, a Honeywell (NYSE: HON) company, announced today that it was awarded an Energy and Environmental Excellence Award from Hart Energy for innovations in refining to meet global energy challenges.

Hart Energy, one of the world's largest energy publishing and consulting groups, presented UOP with the award to honor UOP innovation in refining technologies based upon overall global vision, management of limited resources and a balanced approach to economics, human need and sustainable growth.

"This award is a distinct honor," said UOP President and Chief Executive Office Carlos A. Cabrera. "Our goal is always to develop the technologies that will drive profitability and efficiency for refiners while helping them to meet the challenges of a changing energy landscape. We are proud of our efforts and grateful for this recognition."

UOP has introduced several new technologies and technology enhancements in the last year that are driving greater yields of high-value, clean fuels and addressing non-traditional feedstock options like heavy, bitumen-derived crudes and biological feedstocks. The UOP/Eni Ecofining™ process uses conventional refinery hydroprocessing technology to convert natural oils and wastes to high-quality green diesel that is a drop in replacement for petroleum diesel. The enhanced two-stage UOP Unicracking™ process combines catalyst development and process innovations to improve distillate yields up to seven percent while reducing investment costs, and UOP's new slurry

-- MORE --

hydrocracking process upgrades bitumen and hard-to-process, heavy crudes to lighter distillates to produce clean gasoline and ultra-low sulfur diesel.

The award was presented at Hart's 2008 Energy Solutions Conferences. This is the eighth year for the awards, which were designed to recognize companies with achievements in energy technology and innovation.

Honeywell International is a \$38 billion diversified technology and manufacturing leader, serving customers worldwide with aerospace products and services; control technologies for buildings, homes and industry; automotive products; turbochargers; and specialty materials. Based in Morris Township, N.J., Honeywell's shares are traded on the New York, London and Chicago Stock Exchanges. For additional information, please visit www.honeywell.com.

UOP LLC, headquartered in Des Plaines, Illinois, USA, is a leading international supplier and licensor of process technology, catalysts, adsorbents, process plants, and consulting services to the petroleum refining, petrochemical, and gas processing industries. UOP is a wholly-owned subsidiary of Honeywell International, Inc. and is part of Honeywell's Specialty Materials strategic business group. For more information, go to www.uop.com.
